SOAP API Proxy

Hybrid Integration Enablement

October 2017

IBM

SOAP

Use Case: I have existing SOAP Services I would like to put under API Management. I may or may not have WSDL's available.

Importing Service API…

- Start with blank definition
- Show Existing URL in browser (validates already published)
- Demo Steps
  - Enter Path
  - Set Security
  - Set Properties for server
  - Import WSDL Services
  - Orchestration on Assembly Pallette
  - Test
  - Add policies if needed.

Creating Interaction API..

- Start with blank definition
- Show Existing URL in browser (validates already published)
- Demo Steps
  - Enter Path
  - Set Security
  - Set Properties for server
  - Import WSDL Services
  - Orchestration on Assembly Pallette
  - Test
  - Add policies if needed.
